Here's what our former patients say about us:

"TESTIMONIALS"

- "I had wonderful care!"
- "Great teacher and caregiver. The doctor said, "Whoever gave the shots did a great job – No bruising!!!"
- "The whole staff was helpful, thoroughly professional in every way and kind. I would recommend them to anyone"
- They answered all my questions. The quality of home health care was superb. With staff like this, it's hard to see where it needs anymore improvement"

We care....

What is Experts Home Health Care?

Knowing what to do for an ill or recovering person and when to cease doing it, begins with understanding not only the disease process, but also what life is like from the perspective of each individual patient. Monthly training enables our staff to polish their clinical and interactive skills, to balance their study of technical advances in home medical care options with old fashioned caring. Equal time and consideration is given to reviewing patient feedback, as on teaching the latest and greatest treatment options.

Teaching Centered Care, Providing Competent, Coordinated, and Compassionate Care in the comfort of Home

Health and independence seem to return more comfortably, in the familiar surroundings of home; amongst compassionate caregivers who respect the uniqueness of each person's health symptoms, needs, values, and lifestyle. For more than 12 years, EXPERTS has succeeded in nurturing 10's of thousands of patients back to health and independence through strong patient, caregiver, and physician communications as well as, technical expertise, teaching centered care, and old fashioned caring.

Our "Expert" team of nurses, physical therapists, occupational therapists, speech pathologists, respiratory therapists, social workers and dieticians will teach good health and safety practices to help slow the progression of certain chronic diseases and avoid new injuries and falls.

How Are We Different?

• **Experts is a CHAP Accredited Home Health Care Agency** – This means that we have voluntarily met the highest standards of excellence for home and community based care, exceeding many of the government's standards for Medicare certification.

• **Translation Services** – Experts offers language translation capabilities for virtually every language in the world. This means all of the patients we care for will have the meaningful opportunity to understand and be understood by caregivers during their healing process.

• **Pathways to Home** – This Program begins when our Social Worker Liaison visits you at the bedside, responds to your questions, and strives to gain an understanding of your individual circumstances. With your consent, she will also talk to your family members and other caregivers review your care needs with the hospital or facility staff, order any needed medical equipment, and link you with other helpful community support services before you even go home.

1-800-768-4663

• **Tele-Health Monitoring** – Tools for maximizing control over chronic medical conditions go beyond just face to face visits. Tele Health Monitoring enables Experts nurses and patients to share an understanding about the individual triggers for fluctuating symptoms such as those that occur with CHF, Diabetes, COPD, Asthma and Hypertension.

• **Anodyne Therapy** – One component of Experts comprehensive diabetes management program is this innovative infrared light treatment known for relief of neuropathy symptoms has avoided amputation in some cases.
